WHY YOU SHOULD CHOOSE BSI TRAINING

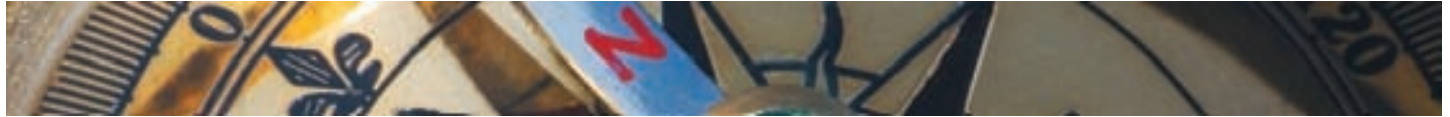

BSI with over 100 years' experience in standards is at the forefront of standards based management system and business improvement learning.

We provide a comprehensive schedule with a full range of courses to support your learning needs – from initial understanding through to qualification as a Lead Auditor and beyond using our LEAN SIX SIGMA courses.

BSI TRAINING'S BLEND OF FAST PACED INTERACTIVE COURSES HELPS YOU TO DELIVER:

- Systems that are developed and owned by those that have to work with them
- Effective and successful systems that deliver real improvements to the bottom line
- Streamlined systems that keep paperwork and bureaucracy to a minimum
- Audits and audit programmes that identify business improvement opportunities whilst ensuring that systems remain in compliance with the standard
- Business improvement projects that are aligned with and enable the achievement of the strategic goals of the organisations
- Integrated systems that enable a business-wide approach that is aligned with your certification body's requirements, potentially saving you thousands of pounds every year

WHY YOU SHOULD CHOOSE BSI TRAINING

OUR TRAINERS

BSI Learning takes great care in selecting high quality venues for our courses, paying special attention to the location, facilities and standards of services. We feel that our delegates deserve the best environment possible during their learning experience.

It has the best in class Trainers in India who have International knowledge & exposure

Many of our clients are now choosing to have the courses delivered at premises of their choice. This provides many benefits and means that we can tailor an existing course to meet your specific needs. Ask for details of this service.

All BSI courses count towards your Continuing Professional Development.

THE BSI CERTIFICATE

The BSI Certificate is recognised throughout the world as a mark of expertise, quality and integrity.

Where appropriate BSI courses are independently certified by IEMA or IRCA.

If you are not sure which is the right programme for you, call one of our training executives at respective BSI offices or visit our website at www.bsigroup.co.in

LEAN SIX SIGMA

INTRODUCTION TO LEAN MANAGEMENT

Lean is an approach to improving business processes based on the systematic elimination of waste and non-value-added activities, and the creation of flow of product or service based on the customer's requirements.

SIX SIGMA GREEN BELT (CERTIFICATE)

Six Sigma Green Belt (certificate) participants receive an introduction to the tools and methods that are necessary to successfully participate in Problem Solving and DMAIC improvement projects in a manufacturing or transactional environment.

LEAN SIX SIGMA OPERATIONAL BLACK BELT

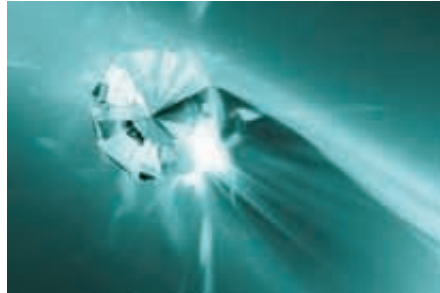

In this training, participants receive an exposure to the tools and methods that are necessary to lead Lean DMAIC improvement projects in a transactional environment. This 20 days programme is delivered in 4 modules of 5 days (typically one month between modules) with hands-on exercises and tutorials.

QUALITY MANAGEMENT

INTRODUCTION: ISO 9001:2008

ISO 9001:2008 is the most widely recognized international standard for Quality Management. It is an area that you simply cannot afford to ignore. The basics of ISO 9001:2008 will be covered in full detail.

IMPLEMENTING: ISO 9001:2008

This comprehensive two-day course helps delegates comprehend and realize the requirements of ISO 9001. It covers all the fundamental disciplines needed and the methods that should be applied when implementing quality management systems from scratch.

INTERNAL AUDITOR: ISO 9001:2008

Practical training on planning and executing internal audits for those with a knowledge of the standard.

LEAD AUDITOR: ISO 9001:2008 IRCA CERTIFIED (A17070) COURSE

Course for quality professionals on planning, conducting and leading effective assessment audits.

COMPLAINTS MANAGEMENT

INTRODUCTION COURSE: COMPLAINTS MANAGEMENT SYSTEM BASED ON ISO 10002:2004

An effective Complaints Management scheme will contribute to the development of a culture of continual improvement. Organisations are recognising that improved systems for capturing customer feedback can provide valuable learning opportunities for almost every part of the organisation.

INFORMATION SECURITY MANAGEMENT

INTRODUCTION: ISO/IEC 27001

This one-day course introduces delegates to the features of the ISO/IEC 27000 standards and the benefits that can be gained by adopting them as part of the corporate information risk management strategy.

IMPLEMENTING: ISO/IEC 27001

This course provides a method and tools to implement an Information Security Management System and forms part of the Lead Implementer course.

INTERNAL AUDITOR: ISO/IEC 27001

Providing a solid foundation in all aspects of the audit process, enabling the delegate to identify potential and actual security weaknesses.

With over 100 years experience in standards, BSI is at the forefront of standards based management systems and business improvement learning.

Through our lean SIX SIGMA courses BSI provides a comprehensive approach to growth by empowering people through continual development and by harnessing skills that can give your business greater productivity in the long-term.

LEAD IMPLEMENTER: ISO/IEC 27001

The objective of this course is to provide delegates with the necessary skills and tools to implement an ISMS that meets the certification requirements of ISO 27001:2005 and is based on the code of practice defined by ISO 17799.

LEAD AUDITOR: ISO/IEC 27001 IRCA CERTIFIED (A17287) COURSE

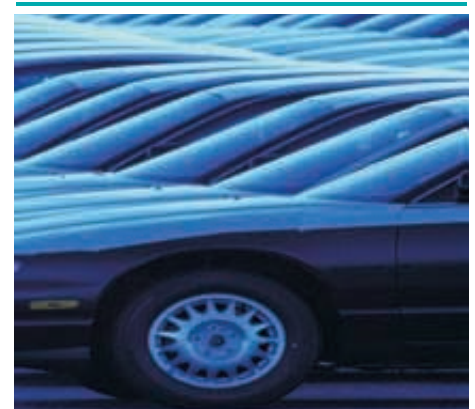

This intensive course prepares delegates for the Lead Auditor qualification process for ISO 27001 and trains them on how to conduct and lead audits.

AUTOMOTIVE SECTOR

INTERNAL AUDITOR: ISO/TS 16949

This programme is designed so that ISO/TS 16949:2002 internal auditor(s) thoroughly understand their role and acquire the learning needed to perform effective audits in their respective organizations.

British Standards & Publications

Purchase standards and publications online at our global shop: www.bsigroup.com/shop

Go to www.bsigroup.co.in for full qualification details.

ENERGY MANAGEMENT

INTRODUCTION AND IMPLEMENTATION COURSE: ISO 50001

ISO 50001 helps organizations establish the systems and processes necessary to improve energy efficiency. This should lead to reductions in cost and greenhouse gas emissions through systematic management of energy. This course introduces and provides method and tools to implement ISO 50001 in any organization.

INTERNAL AUDITOR: ISO 50001

ISO 50001 Internal auditor course provides solid foundation in all aspects of the audit process of Energy Management.

LEAD AUDITOR: ISO 50001

ISO 50001 Internal auditor course provides solid foundation in all aspects of the audit process of Energy Management.

ENVIRONMENTAL MANAGEMENT

INTRODUCTION: ISO 14001

This one-day training course provides an overview of environmental management systems for anyone who wants to understand how environmental policies and best practice can enhance their business.

IMPLEMENTING: ISO 14001

This two-day course gives delegates the tools and techniques to analyse the business and move forward with implementing an Environmental Management System.

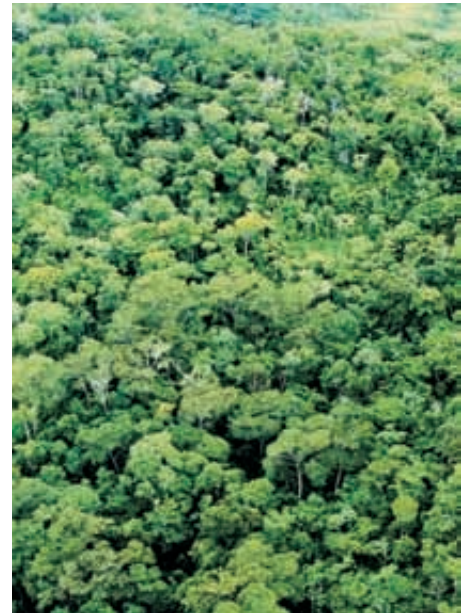

INTERNAL AUDITOR: ISO 14001

Course for environmental professionals on planning, conducting effective audits as internal auditor.

IEMA APPROVED ADVANCED EMS LEAD AUDITOR COURSE

Course for environmental professionals on planning, conducting and leading effective audits.

OCCUPATIONAL HEALTH & SAFETY

INTRODUCTION TO: BS OHSAS 18001

This introduction course provides delegates with an overview of the principles behind the management of health and safety in the workplace and the requirements of BS OHSAS 18001:2007.

IMPLEMENTING: BS OHSAS 18001

This course provides an overview of Health and Safety Management Systems and implementation techniques.

INTERNAL AUDITOR: BS OHSAS 18001

This course provides an overview of Health and Safety Management Systems and its auditing techniques.

LEAD AUDITOR: BS OHSAS 18001 IRCA CERTIFIED (A17036) COURSE

Designed to enable delegates to plan, conduct and lead effective audits based on BS OHSAS 18001.

BUSINESS CONTINUITY

INTRODUCTION: BS 25999

This course provides a solid understanding of Business Continuity Management. Practical exercises and instructor-led discussions will help students appreciate the benefits of business continuity management in an organisation.

IMPLEMENTATION: BS 25999

This course provides practical tools and methods of implementing business continuity management. This implementation course is based on industry best practice and the Business Continuity Management (BCM) Code of Practice released by BSI, BS 25999

INTERNAL AUDITOR : BS 25999

This course provides students with the skills and knowledge to conduct and lead effective Business Continuity Management System audits in accordance with the requirements of BS 25999.

LEAD AUDITOR : BS 25999 IRCA CERTIFIED (A17456) COURSE

This course provides students with the skills and knowledge to conduct and lead effective Business Continuity Management System audits in accordance with the requirements of BS 25999-2:2007 and ISO 19011:2002. Learning is achieved through a balance of classroom tutorials, practical role-playing, group workshops, and open forum discussions.

The course instructs about food safety auditors in the principles and practices specific to auditing for conformance with ISO 22000:2005, including planning and preparation of the audit, audit practices, and reporting audit findings

BRA WORKSHOP

BUSINESS RISK ASSESSMENT WORKSHOP

Businesses all over have priorities based on their own position compared with the market. Attention is normally focused onto the areas that the company perceives to have a higher business risk. There is a danger of not realising which are the greatest risks and which of them must be focussed upon by the organisation. In order to improve business decision making, Risk Management today is rapidly gaining acceptance and is helping organisations manage their businesses better, which in today's hypercompetitive environment is an imperative. This workshop is a facilitation of an organisation's executive team who contribute their own experiences, ideas and thoughts to determine business risks and identify through a rating process those that the organisation needs to prioritise and manage in order to run a successful, well managed and controlled business.

The workshop covers:

- Identify the business risks related to organisation's objectives
- Evaluation of risk factors
- Evaluation of Controls on identified risks
- Comparing strength of controls with regard to risk and vulnerability

Benefits:

- Holistic risk based management
- Systematic risk treatment by "Terminating, Testing, Transferring or Tolerating" the risk
- Setting best practice for managing the business
